Art Unit: 1764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a method of evaporating a liquid, classified in class 203, subclass 98.
- II. Claims 5-20, drawn to an apparatus for effecting evaporation of a volatile solvents, classified in class 202, subclass 160.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practised by another materially different apparatus such as : ( For Examples Only), single effect system; short-path evaporators; self or forced circulation evaporators; and downflow or falling-film evaporators, and etc. Likewise, the apparatus as claimed can be used to practise another and materially different process such as: blowing or bubbling an inert gas through the surface of the liquid being evaporated and therefore is not limited to the method as embodied in the group I invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1764

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
